DIGITAL LITERACY PROJECT

Name: Jheel Shah
Registration Number: 25BAI10895
Branch: B.Tech CSE (AI/ML)
University: VIT Bhopal University
Course Code: CSE0001
Date: 31/03/2026

INTRODUCTION:

This project was undertaken as part of the Digital Literacy course to understand and apply essential digital skills required in today's digital world. As a student digital ambassador, the objective was to explore various aspects of digital literacy, including online safety, professional communication, and the effective use of digital platforms.

The project consists of five tasks, each focusing on different areas such as creating an infographic, building a digital portfolio, exploring coding and collaboration tools, understanding email etiquette, and studying cybercrime awareness. Through these tasks, I gained practical knowledge and developed a better understanding of responsible and efficient use of digital technologies.

TASK- 1 Write-up:

For Task 1, I created a digital literacy infographic using Canva. The infographic covers important topics such as what digital literacy is, useful tools for students, safe internet practices, professional online presence, and email etiquette. I designed the infographic using a clean layout, soft color palette, and simple icons to make the content visually appealing and easy to understand.

The objective was to present information in a concise and engaging way so that students can quickly grasp the key concepts. While creating the infographic, I found it slightly challenging to balance the content and maintain a neat design without overcrowding it. However, this task helped me learn how to communicate information visually and effectively.

TASK- 2 Write-up:

For Task 2, I created my digital portfolio by setting up profiles on GitHub, LinkedIn, and HackerRank. GitHub is used to store and showcase coding projects, LinkedIn helps in building a professional network, and HackerRank allows practice of coding and problem-solving skills.

I created a GitHub profile README to introduce myself and added my educational details on LinkedIn. These platforms are important for building a strong digital presence and preparing for future career opportunities. Over the next four years, I plan to use these platforms actively to build projects, improve my skills, and connect with professionals in the technology field.

TASK- 3 Write-up:

In Task 3, I explored coding and collaboration platforms by using HackerRank and Google Forms. On HackerRank, I solved a beginner-level problem which helped me understand basic programming logic and improve my problem-solving skills.

I also created a Digital Literacy Awareness Quiz using Google Forms, which included multiple-choice and short-answer questions. This helped me learn how to design forms and collect responses efficiently. These tools are useful for academic purposes, as coding platforms help in improving programming skills and Google Forms supports collaboration and data collection.

TASK-4 Write-up:

In digital communication, poor email etiquette can lead to misunderstandings and create a negative impression. For example, sending an email without a clear subject line or using an informal tone when communicating with a professor may be considered unprofessional.

Such situations can be avoided by using proper structure, respectful language, and clear communication. Including a subject line, greeting, and a polite closing ensures that the message is understood and taken seriously. This task helped me understand the importance of maintaining professionalism in digital communication.

TASK- 5 Write-up:

In digital communication, poor email etiquette can lead to misunderstandings and create a negative impression. For example, sending an email without a clear subject line or using an informal tone when communicating with a professor may be considered unprofessional.

Such situations can be avoided by using proper structure, respectful language, and clear communication. Including a subject line, greeting, and a polite closing ensures that the message is understood and taken seriously. This task helped me understand the importance of maintaining professionalism in digital communication.

CONCLUSION:

Overall, this project helped me develop a strong understanding of digital literacy and its importance in everyday life. I learned how to use digital tools effectively, communicate professionally, and stay safe online. The tasks provided practical exposure and improved my confidence in handling digital platforms. This knowledge will be useful for my academic growth and future career opportunities.
